

Thank you for collaborating with us for a **better behind-the scenes**, integrating **Zero Waste standards** and recirculating **reusable materials** back into the community.

Info We Need

- Concepts
- Call with Production Team
- All Project Dates (Build, Pre-Light, Shoot, Strike)

Production Contacts Needed:

(name, email & phone)

- Producer, Production Supervisor, Coordinator
- Location Manager or Stage Contact
- Caterer and Craft Service
- Wardrobe Stylist or Assistant
- Gang Boss

Art Department Contacts Needed:

(name, email & phone)

- Art Department Coordinator
- Leadman
- Construction Coordinator
- Scenic Company Contact (if applicable)
- Greens or Snow Effects Company (if applicable)

How Does Water Work?

EcoSet Provides:

- Reusable bottles (if purchased from us)
- Portable refill stations (pump, cooler, ice, sun shade, 100 paper cups per day)

If reusable bottles are not purchased for the shoot, crew and cast should be notified in advance to bring their own containers.

Production Provides / Pays For:

- All rented water dispensers
- 5-gallon jugs and all refills for the shoot
- PAs refill jugs during the shoot as needed

For 50 or more people, **4 dispensers & 8-10 jugs per shoot day** are required

How Does Waste Work?

EcoSet Provides / Pays For:

- All bins and liners (Recycling / Organics / Landfill)
- Dumpsters and hauler scheduling
- EcoSet's crew is covered by our Payroll and Workers Comp
- EcoSet does not deconstruct scenic builds or do final stage or location sweeps as part of our services

Compostable Products and Reusable Service Ware

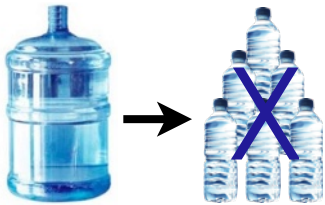

- Production Provides / Pays For:**
- Compostable disposable products for Catering and Craft Service. These are paper and plant-based items. Foam products are not allowed. EcoSet can recommend where to purchase products that are compatible with our process.

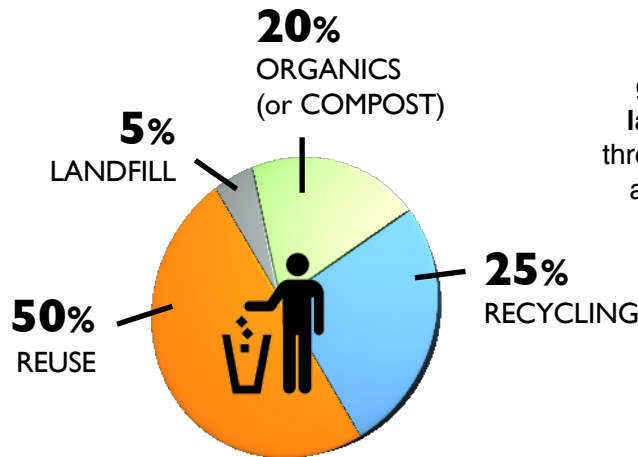

To minimize costs, require your caterer to provide **reusable plates and utensils** for each production member

What's Possible with Waste Prevention & Diversion

Water dispensers and 5-gallon jugs avoid **300-600** single-use plastic bottles per day

ZERO WASTE is defined as **90% or greater diversion from landfill**. This is achieved through **waste prevention** and **direct supervision**.

Donation vs. Disposal

EcoSet recirculates **scenic builds, custom props, reusable creative materials, set dressing, wardrobe and expendables** to local non-profit organizations and individuals. Surplus production items are available at no cost to **schools, social services, theaters, filmmakers, artists, camps, parks** and many others through our Materials Oasis reuse center.

providing access to the excess
